

hurdlepro

Risk Management

Hurdle is a powerful risk and action management system designed to help organisations manage and control risks and actions in their business.

Easy to use and fully auditable. Hurdle enables teamwork and is perfect for successful collaboration.

Our system is easily configured for individual companies and can be used to manage enterprise, project & HSE risks and actions. Hurdlepro is a step change from managing risks and actions on a spreadsheet.

Easily accessed from any location it's completely secure and fully backed up within the cloud meaning no expensive hardware costs
